Get Control & Improve Operations!

Mobile Inventory for Store Manager streamlines inventory processes to improve profit margins and productivity. The mobile barcode scanner links to the POS computer, enabling you to:

- **Scan new products into inventory at point of arrival**
- **Replace or update inventory quantities from anywhere in the store or warehouse**
- **Lookup or change item pricing on the fly**
- **Edit item description, cost, MSRP, price, quantity, location and vendor**
- **Facilitate accurate physical counts with comparative reporting**
- **Experience worry-free integration with Store Manager's product database**
- **Lookup item quantity on hand**
- **Synchronize to database with a single-button — no complicated data mapping**
- **Customize scanner settings for more control**

Integration has Never Been Easier!

Proxis Mobile Inventory for Store Manager delivers 360-degree integration! The wireless scanner, Mobile Inventory Software, and Store Manager product database communicate and exchange data with one-touch synchronization! Our preconfigured Kits enable easy set up and freedom of choice.

Manage Inventory with an Xt50 Portable Barcode Scanner
Flexible wireless barcode scanning with user friendly menu and 2MB memory (15,000 products)

Manage Inventory with a Symbol Palm Scanner
